The Solution for Damaged Panels

Looking for a Bottom Replacement Panel that really works?

DL Manufacturing's RxV Replacement Panel can knock out in either direction. RxV is your solution to the constant abuse on your loading dock door.

RxV is self-correcting and eliminates troublesome air and light gaps. Whether your damage is from Pallet Staging or Lazy Springs, RxV is the right solution for you.

Benefits:

- Can be knocked IN or OUT
- Insulated panels
- Eliminates continuous replacement of damaged bottom panels
- Allows your sectional door to run smoother
- Easy to install

Exclusive NO ROLLER brush guide system enables RxV to self-correct!

Optional Track guards protect the base of the track in an area prone to collision damage.

Patented brush guide system with optional brush style bottom seal eliminates air/light gaps and offers vermin protection.

Door resets automatically simply by opening and closing.

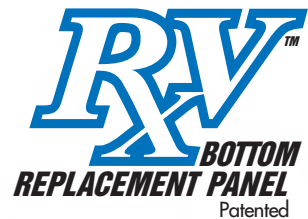

Optional Lock engages easily and offers intruder security.

SPECIFICATIONS:

- Available in widths up to 10 feet
- Insulated flexible panels
- Steel track inserts
- Rubber bottom seal (standard)
- Brush style bottom seal (optional)

FEATURES:

- Patented brush guide system
- Automatic resetting by opening & closing the door
- Suitable for most sectional doors
- Easy installation
- Maintenance Free Operation
