IN THE USA

U-SEAL

NON-COMPRESSION DOCK SEAL

U-Seal Non-Compression Dock Seal

While other dock seals work strictly on compression, the U-Seal's patented hollow foam core design reduces building load and wear and tear on the dock seal face. The unique "U" shape features an inner and outer foam finger that folds and conforms to various trailer types. The innovative design also minimizes the footprint within the impact zone of the forklift and pallet loading area when engaged in the trailer.

Features –

- Polyurethane foam
- Models made with 40 oz vinyl
- Secondary 40 oz vinyl wear face for added durability in the contact zone
- Corners reinforced with triple layer 40 oz vinyl protection
- Replaceable wear surfaces
