DOCK CORNER SEAL

The dock corner has always been problematic from an energy loss and sanitation perspective. The Dock Corner Seal is a quick, simple way to close the gap.

Keep Bugs and Vermin Out and Energy Savings In

Gaping holes around the dock levelers are another challenging problem for facility managers. For years, companies have been trying to tackle "the gap" between the dock seals and the leveler. DL Manufacturing has the solution with our new Dock Corner Seal. Whether the issue is energy loss or sanitation, the Dock Corner Seal fills the gap.

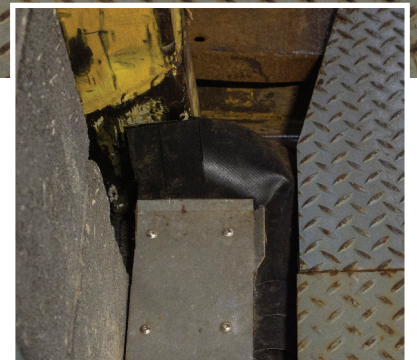

The Dock Corner Seal's simple design uses brush technology that is easy to install and durable to withstand the rigors of the loading dock environment, so saving energy and improving sanitation is simple and affordable.

Package includes: Two Dock Corner Seals, Hardware package if using with vertical storing levelers.

Visit www.dlmanufacturing.com to view our Dock Corner Seal installation video.

Before Dock Corner Seal you can see open areas susceptible to air infiltration and vermin infestation

After Dock Corner Seal those same open areas are eliminated
