DLX OPERATOR

PATENT PENDING

DLX Operator™ — Designed for tomorrow's loading dock!

DLX Operator™ Features:

- Improved ergonomics for loading dock workers
- Lightweight (under 20 lbs) – for easy installation and maintenance
- Simple to setup, program and operate...No desperate tech support calls needed!
- Sensorless limits – all programming done from user station, (not 20' in the air)
- Low power from push button box to shaft mounted operator
- No need to reset limits after power interruption or manual door use
- Direct coupled to door shaft
- Integrates directly with door support brackets, no wall mounting required for most applications.
- Loss of power/function – open mechanical switch (pull cord) and run the door manually
- Maintenance friendly – simple diagnostics
- Integration capability with building management system (dry contact option)
- Dedicated Entrapment Protection circuit(s) available

DLX Operator™ Specifications:

- Input is 120V-230V, 1Ph, 6A at control box
- Low-voltage connection (24V) out to operator
- Under 20 lbs
- Onboard troubleshooting/diagnostic system
