U-SEAL

NON-COMPRESSION DOCK SEAL

U-Seal Non-Compression Dock Seal

While other dock seals work strictly on compression, the U-Seal's patented hollow foam core design reduces building load and wear and tear on the dock seal face. The unique "U" shape features an outer foam finger that folds and conforms to various trailer types. The innovative design also minimizes the footprint within the impact zone of the forklift and pallet loading area when engaged in the trailer.

U-Seal Features:

- Polyurethane foam – Hollow Core
- Made with 40 oz Vinyl Fabric
- Front Face Wear pleats with High-Tear Vinyl, 4" Corner Exposure Pleats, 8" Vertical Pleats added for durability in the contact zones
- Great for cold storage and temperature controlled environments
